Pharmacology Flash Cards

Valerie I. Leek, MSN, RNC-NIC, CMSRN
Assistant Professor of Nursing
Cumberland County College
Vineland, New Jersey

F. A. DAVIS COMPANY • Philadelphia

About the pagination of this eBook

This eBook contains a series of flash cards. In the printed version of the book, the front and flip sides of each flash card are numbered with the same card number. Since our eBooks cannot accommodate duplicate page numbers, we have inserted the suffix “a” after the card number on the flip side – or answer side – of the cards.

For example, the front side or question side of flash card #1 is numbered 1. The flip side or answer side of flash card #1 is numbered 1a.

As new scientific information becomes available through basic and clinical research, recommended treatments and drug therapies undergo changes. The author(s) and publisher have done everything possible to make this book accurate, up to date, and in accord with accepted standards at the time of publication. The author(s), editors, and publisher are not responsible for errors or omissions or for consequences from application of the book, and make no warranty, expressed or implied, in regard to the contents of the book. Any practice described in this book should be applied by the reader in accordance with professional standards of care used in regard to the unique circumstances that may apply in each situation. The reader is advised always to check product information (package inserts) for changes and new information regarding dose and contraindications before administering any drug. Caution is especially urged when using new or infrequently ordered drugs.

Authorization to photocopy items for internal or personal use, or the internal or personal use of specific clients, is granted by F. A. Davis Company for users registered with the Copyright Clearance Center (CCC) Transactional Reporting Service, provided that the fee of \$.10 per copy is paid directly to CCC, 222 Rosewood Drive, Danvers, MA 01923. For those organizations that have been granted a photocopy license by CCC, a separate system of payment has been arranged. The fee code for users of the Transactional Reporting Service is: 8036-1169-2/04 0 + \$.10.

Dedication

To my husband, David, whose love, faith, and wonderful dinners made hard work so bearable.

To my son Zachary, whose vision and hope are larger than life.

To my son Jeffrey, whose love and gentle patience calm me.

To my granddaughter Cadence, who I hope will be proud of her Noni.

To my parents Pauline and Harry Fallows, whose love and support are limitless.

To my colleagues, Joy Wood, Priscilla Meyers, and Deirdre Conroy, who supported me in the development and application of this project.

Acknowledgments

I would like to thank all the hard-working nursing students who used my *Pharm Phlash!*, survived it, and learned. You are the amazing, transformed persons who sustain me in my practice as an instructor.

I'd also like to thank all the wonderful people I've worked with at F.A. Davis Company, including Tom, Nora, and Julie. You've made this journey a pleasant one.

BONUS CD-ROM INSIDE!

Davis's
SUCCESS SERIES

Two Books In One!

Course review now. NCLEX®-prep later.

- ✓ A complete review of core concepts.
- ✓ Thousands of classroom-tested, NCLEX®-style questions. (Alternate format, too!)
- ✓ Test-taking hints and rationales for correct and incorrect answers.

Are you feeling overwhelmed by the seemingly huge amount of pharmacology information you must master? Turn to **Pharmacology Success** for the help you need to build your confidence.

- **1,150 multiple-choice and alternate format questions**, organized by body systems and specific diseases, cover the content of your entire pharmacology course.
- **Rationales** for both **correct** and **incorrect answers**.
- **Bonus CD-ROM** with **two 50-question exams**.

Abbreviations Used on Cards

ABGs	arterial blood gases	CHF	congestive heart failure	DMARD	disease modulating anti-rheumatic drug
ac	before meals	CNS	central nervous system	DNA	deoxyribonucleic acid
ACE	angiotensin-converting enzyme	CO	cardiac output	DVT	deep vein thrombosis
ADH	antidiuretic hormone	COPD	chronic obstructive pulmonary disease	ECG	electrocardiogram
ADHD	attention-deficit/hyperactivity disorder	CPK	creatine phosphokinase	EEG	electroencephalogram
AFB	acid-fast bacillus	CR	controlled release	EENT	eye, ear, nose, and throat
ALT	alanine aminotransferase	CSF	colony-stimulating factor; cerebrospinal fluid	EMS	Emergency Medical Services
ANA	antinuclear antibodies	CT	computerized tomography	Endo	endocrine
APAP	acetaminophen	CV	cardiovascular	EPS	extrapyramidal symptoms
aPTT	activated partial thromboplastin time	CVA	cerebrovascular accident	ER	extended-release
ASA	acetylsalicylic acid	CVC	central venous catheter	ESRD	end-stage renal disease
AST	aspartate aminotransferase	CVP	central venous pressure	F and E	fluid and electrolyte
bid	two times a day	CXR	chest x-ray	G, g, gm	gram
BMS	bone marrow suppression	D5/0.9%NaCl	5% dextrose and normal saline solution (0.9% NaCl)	GABA	gamma-aminobutyric acid
BNP	brain natriuretic peptide	D5/½ NS	5% dextrose and half normal saline solution (0.45% NaCl)	GERD	gastroesophageal reflux disease
BP	blood pressure	D5W	5% dextrose in water	GFR	glomerular filtration rate
bpm	beats per minute	Derm	dermatology	GI	gastrointestinal
BUN	blood urea nitrogen	DKA	diabetic ketoacidosis	GTT	glucose tolerance test
Ca+	serum calcium	dL	deciliter	GU	genitourinary
cap	capsule			HCP	health-care professional
CBC	complete blood count				

HDL	high-density lipoproteins	mcg	microgram(s)	OCD	obsessive-compulsive disorder
Hemat	hematologic	MDI	metered dose inhaler	Oint	ointment
Hgb A_{1c}	hemoglobin A _{1c} glycosylated hemoglobin	mEq	milliequivalent	Ophth	ophthalmic
hr	hour(s)	Metab	metabolic	OTC	over-the-counter
HRT	hormone replacement therapy	mg	milligram	oz	ounce(s)
HTN	hypertension	Mg+	serum magnesium	pc	after meals
IM	intramuscular	MI	myocardial infarction	PCA	patient-controlled analgesia
Inhaln	inhalation	min	minute(s)	PCWP	pulmonary capillary wedge pressure
INR	international normalized ratio	Misc	miscellaneous	PE	pulmonary embolus
I&O	intake and output	mL	milliliter	PO	by mouth, orally
IT	intrathecal	mo	month(s)	Prn	as needed
IV	intravenous	MRI	magnetic resonance imaging	PT	prothrombin time
K⁺	potassium	MS	musculoskeletal	PVC	premature ventricular contractions
KCl	potassium chloride	Na	sodium	q	every
kg	kilogram	NaCl	sodium chloride	qid	four times a day
L	liter	0.9% NaCl	0.9% NaCl solution/ normal saline	RA	rheumatoid arthritis
LA	long-acting	Neuro	neurologic	RBC	red blood cell
LDH	lactic dehydrogenase	NG	nasogastric	RDA	recommended daily allowance
LDL	low-density lipoproteins	NMDA	<i>N</i> -methyl-D-aspartate	Rect	rectum
LFT	liver function tests	NPO	nothing by mouth	REM	rapid-eye movement
LR	lactated Ringer's solution	NRTI	nucleoside reverse transcriptase inhibitor	Resp	respiratory
MAO	monoamine oxidase	NS(S)	normal saline (solution)	RFT	renal function tests
MAOI	monoamine oxidase inhibitor	NSAIDs	non-steroidal anti-inflammatory drugs		

RNA	ribonucleic acid	supp	suppository	VT	ventricular tachycardia
R_x	prescription	tab	tablet	WBC	white blood cell
SA	sinoatrial	TB	tuberculosis	wk	week(s)
SAMe	S-adenosyl-L-methionine	tbs	tablespoon(s)	yr	year(s)
subcut (sc)	subcutaneously	tid	three times a day	↑	increased or high
sec(s)	second(s)	TNF	tumor necrosis factor	↓	decreased or low
SL	sublingual	Top	topically or topical		
SOB	shortness of breath	tsp	teaspoon		
SR	sustained release	VFib	ventricular fibrillation		
SSRIs	selective serotonin reuptake inhibitor(s)	VLDL	very low-density lipoproteins		
stat	immediately	VS	vital sounds		

Contents

Gastrointestinal System Drugs, Cards 1–27

- Electrolyte Modifiers, Cards 1–5
- Gastric Mucosa Protectors, Cards 6–10
- Antidiarrheals, Cards 11–13
- Irritable Bowel Syndrome, Card 14
- Laxatives/Bowel Preps/Antiflatulents, Cards 15–21
- Antiemetics, Cards 22–26
- Appetite Stimulants, Card 27

Endocrine System Drugs, Cards 28–50

- Insulin—Very Rapid-Acting, Card 28
- Insulin—Rapid-Acting, Card 29
- Insulin—Slow-Acting, Card 30
- Insulin—Basal Agents, Card 31
- Antidiabetic Agents, Cards 32–39
- Pancreatics, Card 40
- Thyroid, Cards 41–43
- Adrenal, Cards 44–45
- Pituitary Drugs, Cards 46–49
- Gonadal, Card 50

Urologic System Drugs, Cards 51–63

- Affecting Urination, Cards 51–52
- Diuretics, Cards 53–55
- Men's Health, Cards 56–58
- Dialysis/Renal Failure, Cards 59–63

Immune System Drugs, Cards 64–94

- Anti-Inflammatory and Disease-Modulating Agents, Cards 64–76
- Anti-Infectives, Cards 77–94

Musculoskeletal System Drugs, Cards 95–99

- Muscle Relaxants, Cards 95–96
- Myasthenia Gravis, Card 97
- Osteoporosis, Cards 98–99

Central Nervous System Drugs, Cards 100–151

- Analgesics, Cards 100–106
- Opioid Reversal Agents, Card 107
- Anesthetics and Sleep Inducers, Cards 108–115

Anticonvulsants, Cards 116–122
Anti-Parkinson's and Anti-Alzheimer's
Agents, Cards 123–130
Affecting Mental Health, Cards 131–142
Stimulants, Cards 143–151

Cardiovascular System Drugs, Cards 152–176

Affecting Coagulation, Cards 152–159
Affecting Contractility/Rhythm/Circulating
Blood Volume, Cards 160–169
Anti-Anginal, Card 170
Lipid-Lowering Agents, Cards 171–175
Blood-Forming Agents, Card 176

Respiratory System Drugs, Cards 177–185

Bronchodilating Agents, Cards 177–180
Mucolytic/Expectorant Agents, Cards 181–182
Anti-Allergy/Anti-Inflammatory
Agents, Cards 183–185

Sensory System Drugs, Cards 186–189

Ophthalmic Agents, Cards 186–189

Introduction

Teaching and learning pharmacology is a large undertaking. Memorization of drugs as single entities is almost impossible, even for those of us with wonderful recall. After years of trial and error, I decided that grouping the drugs in classes would be the best method of instruction to promote student recall. *Pharm Phlash!* is the happy result of this type of instruction.

Pharm Phlash! is a tried and true method of pharmacology instruction. Students learn to take clues from both the generic and trade names. When I ask students “What kind of drug ends with ‘olol,’ ‘ilol,’ or ‘alol,’ they can tell me quickly that these are beta-adrenergic blockers. As a pharmacology instructor, this is music to my ears. I hope you will experience the same results.

I recommend that students practice their knowledge by reinforcing quizzes and tests. I have

written 8 quizzes and 2 tests that can be accessed on the DavisPlus website.

Medications are grouped in systems, and then into pharmacologic groups with similar action. There is a table of contents for general access and a full index alphabetized that will direct you by generic, brand name, and Canadian brand names (♦). The cards are designed with the drug names on the front with their body system and basic use.

On the back of the cards you will find

1. Therapeutic/Pharmacologic class (these are always listed in this order)
2. Indications for use of the drug
3. Action of the drug
4. Adverse Reactions/Side Effects detailing all reactions but important information will appear in bold, red type

5. Keep in Mind section that includes client teaching
6. Make the Connection area where information crucial to safe medication information is listed. Again extremely important information is in bold, red type. Laboratory and vital sign parameters are listed here, along with nursing implications and evaluative data.
7. Possible nursing diagnoses are listed to help with care planning activities.
8. Other applications for the drugs are listed as a cross-referencing tool.

This learning system is not meant to replace a complete drug reference book or pharmacology text. It is meant as a tool to mentally group and learn common drugs. Students who employ this system will “make the connection” and learn their medications, laboratory values that are important for safe administration, and vital sign parameters. Best of luck to all.
